Visibility Management

Airbus – Customer Digital Experience

TechRequest Operations

January 2018

AIRBUS

Visibility Management

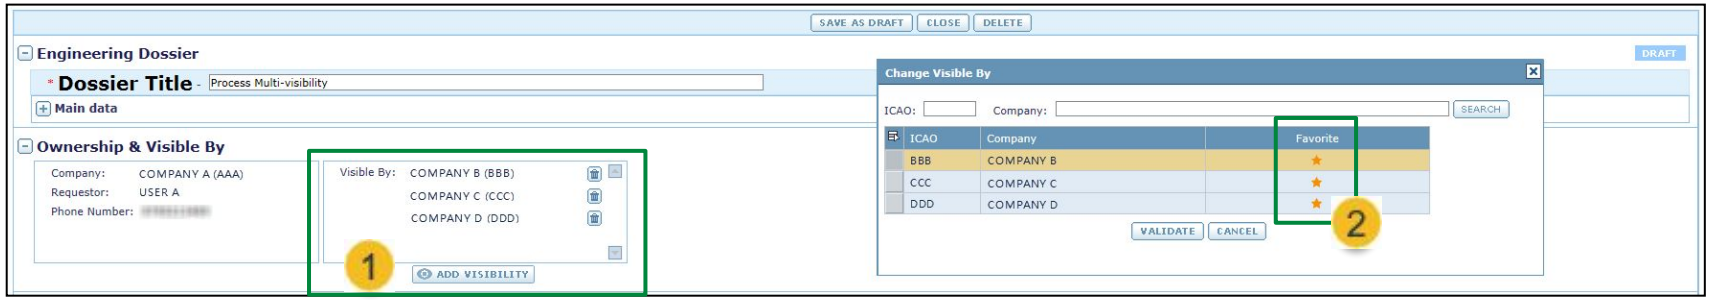
Dossier creation | Retroactive Visibility | Visibility removal | Change of Requestor | Visibility History

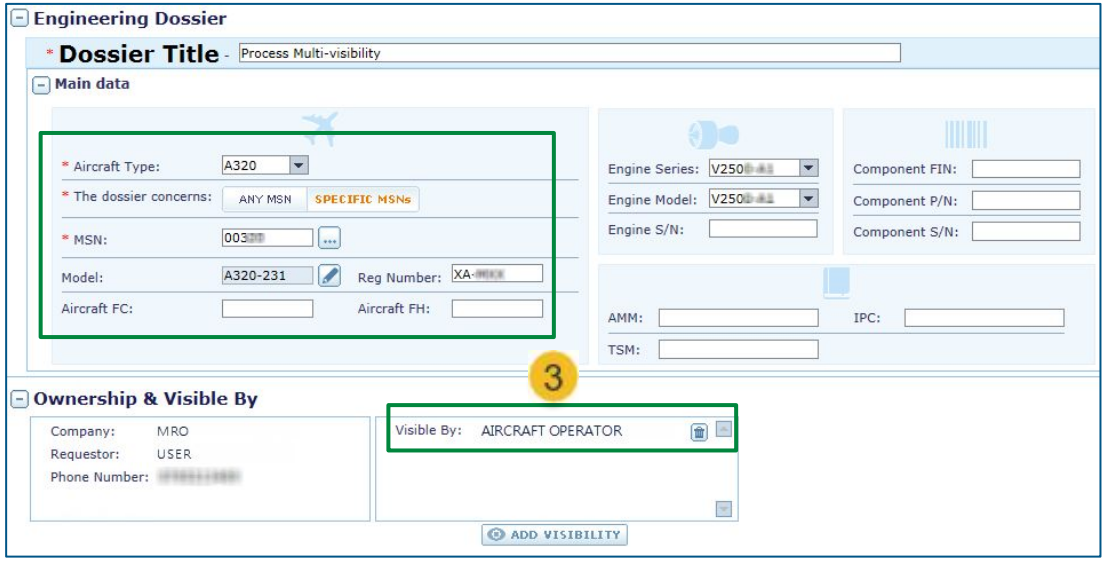
1. You can give the visibility to **several entities** (as many entity as you want).

2. It is possible to add **Favorite** entities by clicking on the star bullet.

3. If the dossier is created by a **MRO**, the **Aircraft Operator** is **automatically** added in *Visible By*. The MRO can remove it by clicking on the trash button before submitting the dossier.

4. **Field Service stations** of each visible by entity are added in copy at the dossier creation. These stations are not updated if a *Visible By* is added or removed once the dossier is opened.





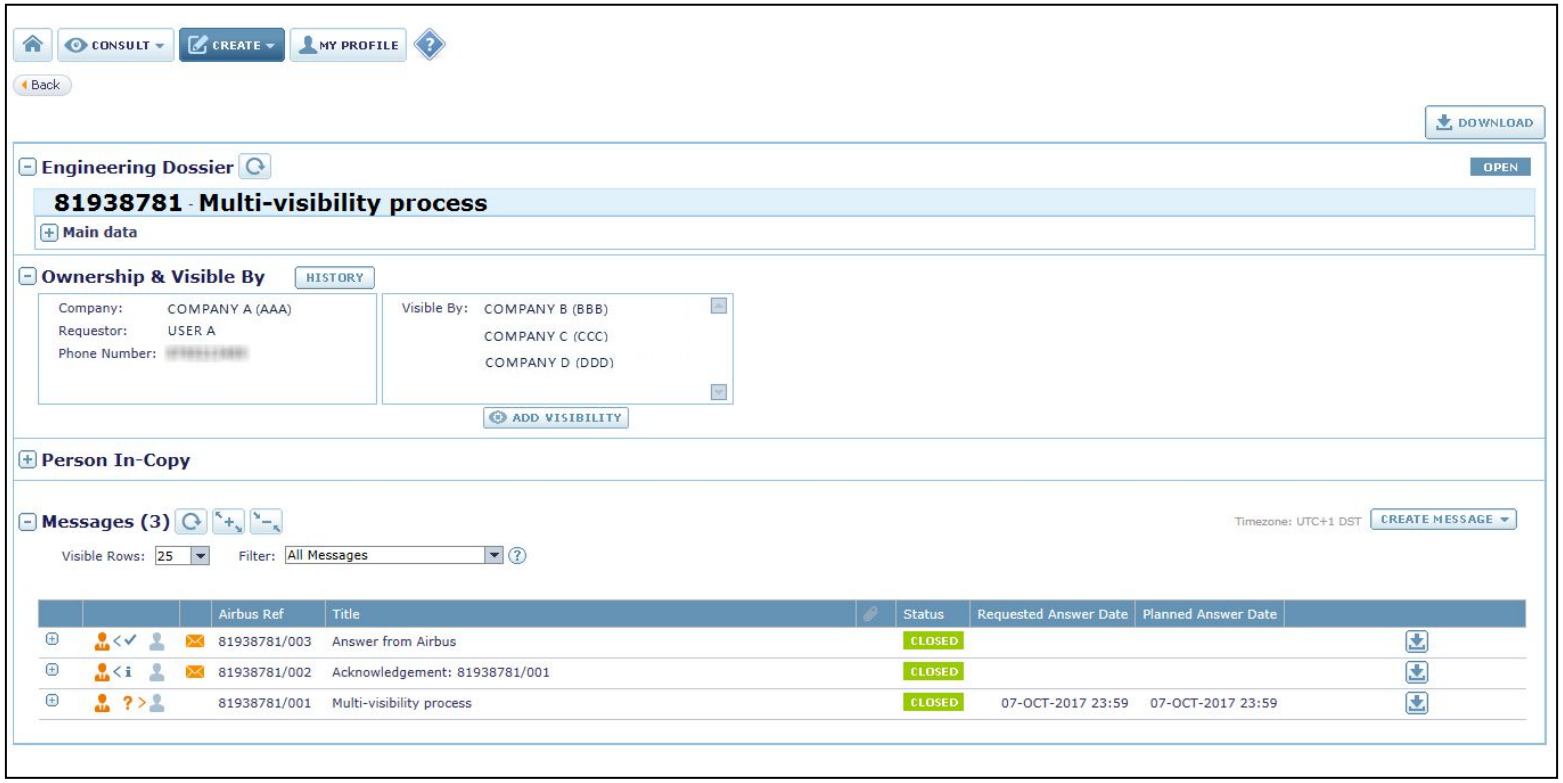
AIRBUS

Visibility Management

Dossier creation | **Retroactive Visibility** | Visibility removal | Change of Requestor | Visibility History

1 The Requestor Entity can give the visibility on its dossier **whatever its status** *(Draft, Open, Closed)*.

- ***Note:*** The entities in *Visible By* can consult the dossier only after its creation. A *Draft* dossier is not Visible.



AIRBUS

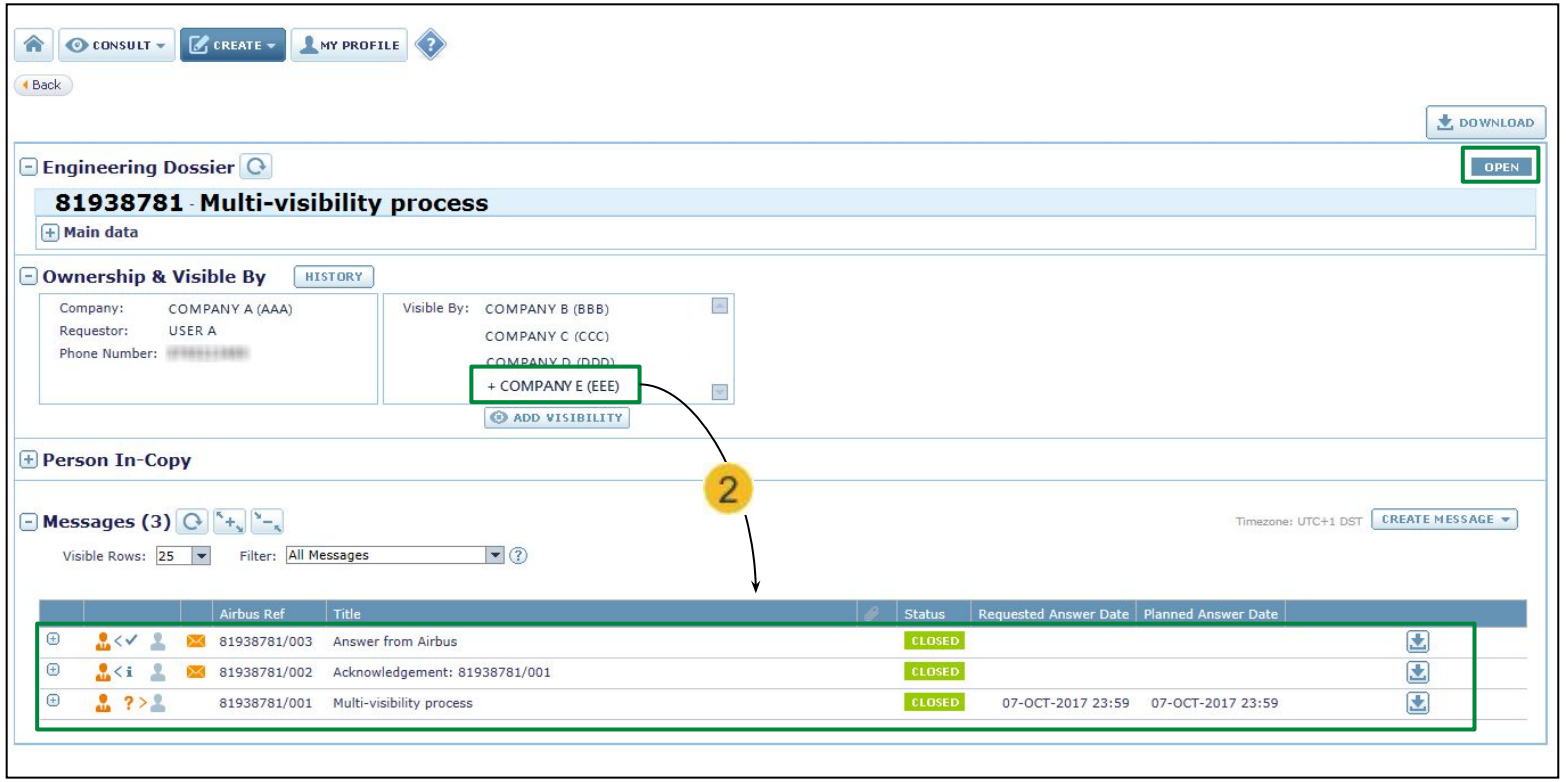
Visibility Management

Dossier creation | **Retroactive Visibility** | Visibility removal | Change of Requestor | Visibility History

1. The Requestor Entity can give the visibility on its dossier **whatever its status** *(Draft, Open, Closed)*.

- ***Note:*** The entities in *Visible By* can consult the dossier only after its creation. A *Draft* dossier is not Visible.

2. The visibility is **retroactive**. *Visible By* Entities added after the dossier creation have the same visibility of the current requestor and can see **previous messages**.



AIRBUS

Visibility Management

Dossier creation | Retroactive Visibility | **Visibility removal** | Change of Requestor | Visibility History

1 Only the *Customer Support* can **remove** the visibility.

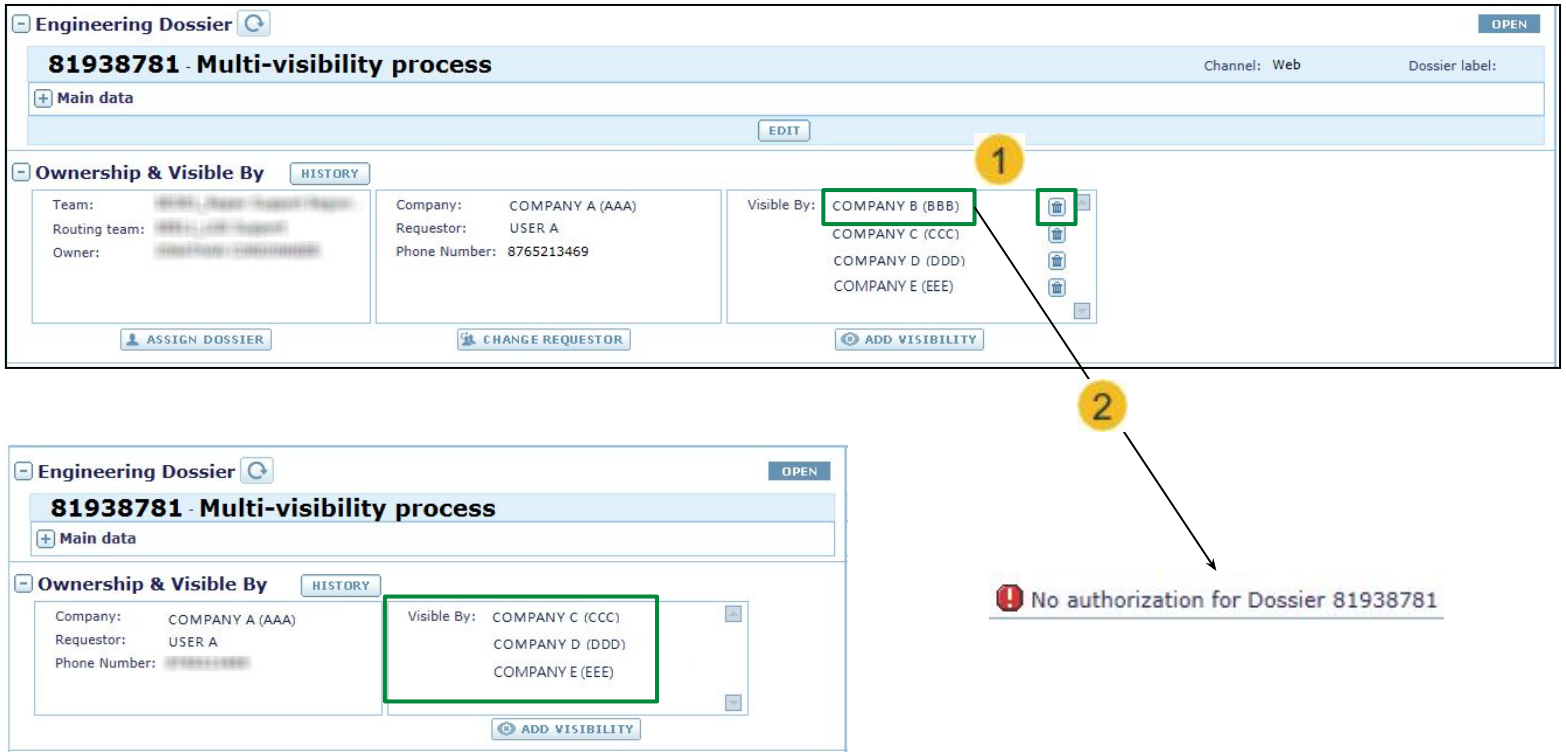
AIRBUS

Visibility Management

Dossier creation | Retroactive Visibility | **Visibility removal** | Change of Requestor | Visibility History

1. Only the *Customer Support* can **remove** the visibility.

2. The removal is also **retroactive**. The removed entity lose the visibility on the **dossier** and **previous messages.**



AIRBUS

Visibility Management

Dossier creation | Retroactive Visibility | Visibility removal | **Change of Requestor** | Visibility History

1 When the Customer Support **changes the Requestor Company** of a dossier, all the *Visible By* entities **are removed** for the **new requestor messages**. Previous visibility is kept.

AIRBUS

Visibility Management

Dossier creation | Retroactive Visibility | Visibility removal | **Change of Requestor** | Visibility History

1. When the Customer Support **changes the Requestor Company** of a dossier, all the *Visible By* entities **are removed** for the **new requestor messages**. Previous visibility is kept.

2. The **new Requestor** can add new *Visible By.*

AIRBUS

Visibility Management

Dossier creation | Retroactive Visibility | Visibility removal | **Change of Requestor** | Visibility History

1. When the Customer Support **changes the Requestor Company** of a dossier, all the *Visible By* entities **are removed** for the **new requestor messages**. Previous visibility is kept.

2. The **new Requestor** can add new *Visible By.*

3. **New** *Visible By* **Entity** can consult only the **new messages**.

AIRBUS

Visibility Management

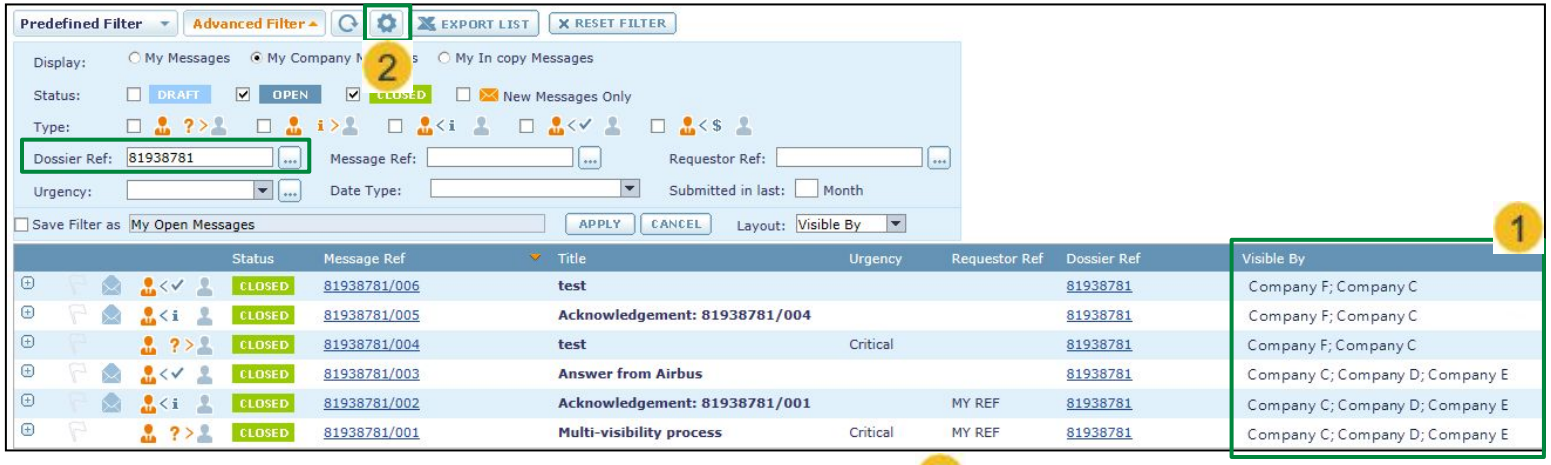
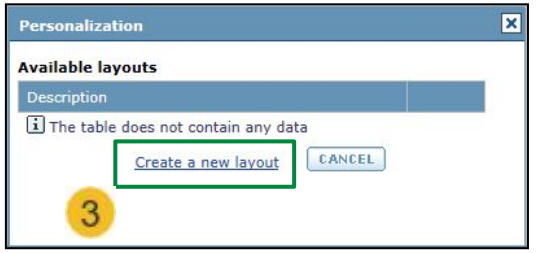
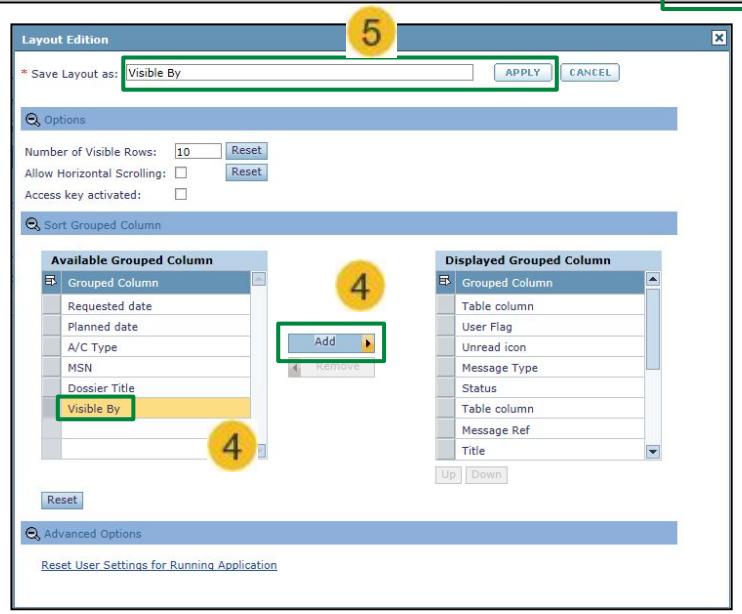
Dossier creation | Retroactive Visibility | Visibility removal | Change of Requestor | **Visibility History**

1. If you are part of several requestors exchanges (as requestor and/or *Visible By*) you can consult the visibility history from the Message dashboard.
2. For this you need to add the *Visible By* column.
3. Create a new layout.
4. Add the *Visible By* columns.
5. Name the layout and save it.







AIRBUS

Visibility Management

Overview

1 Several entities in Visible By

The Requestor can give the **visibility to several entities.**

2 Operator visibility by default

When a **MRO** creates a dossier, the visibility is automatically given to the **Aircraft Operator** (when it can be identified). The MRO can remove it before submitting the dossier.
